Professional Summary

Data Analytics professional turning raw, multi-source data into actionable business insight using Python, SQL, and Excel. Built automated EDA and feature-engineering pipelines across 50,000+ records, improving reporting accuracy by 35% and cutting manual query overhead by 40%. Google Data Analytics Professional Certified, with strong grounding in data cleaning, statistical pattern recognition, and stakeholder reporting.

Education

VIT Bhopal University

B.Tech in Computer Science & Engineering (AI & ML) — CGPA: 8.47/10

Jul 2023 – May 2027

Bhopal, India

Work Experience

Backend & Platform Engineering Intern

Salesforce

May 2025 – Aug 2025

Hybrid

- Automated 10+ recurring business reports and redesigned role-based access controls for 200+ users on Salesforce's AWS infrastructure, cutting manual SQL query overhead by 40%, improving data-access efficiency by 25%, and reducing cross-functional reporting turnaround by 30%.

Data Science & Analytics Intern

Cognifyz Technologies

Oct 2025 – Nov 2025

Nagpur, Maharashtra

- Built reusable Python (pandas, NumPy) EDA and feature-engineering pipelines across 50,000+ enterprise records, replacing ad-hoc Excel/SQL workflows — improving reporting accuracy by 35%, cutting data-preparation overhead by 40%, and resolving 15+ critical anomalies through statistical outlier detection.

Key Projects

APS Sensor Fault Prediction System | Python, MongoDB Atlas, AWS S3, Docker, FastAPI, XGBoost | [GitHub](#) Jan – Apr 2026

- Delivered a governed, analysis-ready dataset from 36,188+ real sensor records by architecting a 6-stage ingestion-to-evaluation pipeline with YAML-based schema validation and data-quality checks, achieving near-zero pipeline failure rate.
- Ensured consistent, high-quality data for downstream analysis and reporting by implementing rule-based validation mirroring enterprise data-quality standards across completeness, conformity, and type-checking coverage.
- Engineered custom logging, exception handling, and retry logic across all pipeline stages, with MongoDB Atlas as the source-of-truth layer and AWS S3 for governed artifact storage.

AI-First CRM for Healthcare Professionals (HCP) | React, Redux, FastAPI, LangGraph, PostgreSQL | [GitHub](#) 2026

- Architected an AI-first CRM module using LangGraph-orchestrated agents to automate healthcare-professional interaction logging, cutting manual documentation effort.
- Enabled real-time, stateful CRM operations by building a React + Redux frontend backed by a FastAPI service layer, with PostgreSQL as the system of record.
- Achieved modular, maintainable service boundaries by separating LLM orchestration, API, and data layers — design principles directly transferable to production analytics pipelines.

Social Media Automation App | React.js, TypeScript, Node.js, REST APIs | [GitHub](#)

May 2026

- Enabled real-time data capture and reporting for end users by integrating a full-stack REST API layer across a React/TypeScript frontend and Node.js backend, ensuring seamless authentication and scheduling flows.
- Maintained 98%+ TypeScript strict-mode coverage across the codebase, reducing runtime errors and improving long-term maintainability.

Technical Skills

Analytics & Reporting: Python (pandas, NumPy), SQL (Advanced), Microsoft Excel (Pivot Tables, Lookups, Dashboards), Statistical Pattern Recognition, Anomaly & Outlier Detection

Data Modeling & Databases: MySQL, MongoDB Atlas (NoSQL), PostgreSQL, H2 Database, Query Optimization, Indexing, Schema Design

Data Preparation: Automated EDA Pipelines, Data Cleaning & Validation, YAML-based Schema Validation, ETL/ELT Workflow Design, Batch Processing

Cloud & Tools: AWS S3, Google Cloud Platform, Docker, Git/GitHub, Postman, FastAPI, REST APIs

Languages: Python, SQL, Java, C++

Achievements & Certifications

President, The Linpack Club, VIT Bhopal

Runner-Up, IEEE Hackathon, VIT Bhopal (Coding Ninjas).

Top-50 Finalist, AI Agent Creator Challenge (Unstop).

Google Data Analytics Professional Certificate (Google)

Applied Machine Learning (University of Michigan)

Google Cloud: Generative AI Learning Path

IBM RAG & Agentic AI

MongoDB Developer's Toolkit (GfG)

DBMS: Fundamentals & Advanced (Scaler)
